Xerox Cloud Consortium
The new force in workflow innovation.

We’re bringing our heritage of innovation in the workplace and extending our value to the cloud. And we’re not alone.

For the past 12 years Xerox and our Business Innovation Partners have been bringing you better ways to work with information with award-winning workflow solutions.

Now we’re turning our attention to the cloud to give you the choices you need for solutions – on-site, cloud-based, self-serve or managed.

We’re inviting these leaders in the document management space to join us in The Xerox Cloud Consortium. Its sole purpose is to bring to market the next wave of innovative cloud-based workflow solutions.

The Consortium has teams of software engineers working together to solve real problems in today’s information-driven workplace.

The Cloud Consortium is growing larger and stronger every day... and so are the reasons you should look to Xerox for cloud solutions. Current Business Innovation Partners can log onto our partner portal with their current login to learn more or apply for membership. For more information on the Xerox Cloud Consortium and Workflow on Demand cloud solutions, visit www.xerox.com/cloudsolutions.
Xerox Cloud Consortium Partners

The following Xerox Business Innovation Partners are now members of the Xerox Cloud Consortium. As you can see, this group delivers a variety of industry leading workflow solutions and they, along with Xerox, are extending these solutions into the cloud.

Want to get more done with less work and more flow?
We’re ready when you are.
